Dog Event First Aid Kit

Please Note

Guidance from a veterinarian is always recommended. If the problem is significant, the dog should be assessed by a veterinarian.

Suggested Item - Use

Gauze Sponges – wiping debris out/away from a wound, absorbs liquid, cover wounds when applying direct pressure

Medical Adhesive Tape – Securing bandage material

Scissors – Cutting bandage and other material

Nylon Leash - restraint, muzzle

Rectal Thermometer / Disposable Rectal Thermometer covers / Lubricant— taking temperature of a dog (Normal 100.5 -102.5)

3% Hydrogen Peroxide – to induce vomiting, to use on infected wounds

Isopropyl Alcohol – Used as a cooling agent to aid heat stroke or fever, acts as a drying agent between toes and skin folds. Do not use on wounds, painful in open wounds.

Topical Antibiotic Ointment – Apply to abrasions

Oral Syringe – Administering liquid medication, flushing wounds, force feeding

Saline Wash / Sterile Eye Lubricant – flush eyes/lubricate after flushing

Benadryl – for bug-bites and stings and other allergic reactions

Nutri-Cal /Corn Syrup – for dogs experiencing a low blood sugar episode

Styptic Powder/Pencil – Stop bleeding of torn toenails or nails that are cut too short

Emergency Vet Phone number – Information should be updated at each new event location

Tweezers or hemostats - To remove splinters / stingers

Band-Aids – For owners/handlers/exhibitors

Hydrocortisone Cream – anti-inflammatory for skin irritations

Imodium - Anti-diarrheal

Q-tips – cleaning small areas
