PREAMBLE
The Border Collie originated in the border country between Scotland and England where the shepherds' breeding selection was based on biddable stock sense and the ability to work long days on rugged terrain. As a result of this selective breeding, the Border Collie developed the unique working style of gathering and fetching the stock with wide sweeping outruns. The stock is then controlled with an intense gaze known as "eye", coupled with a walking style of movement. This selective breeding over time developed the Border Collie's intensity, energy and trainability which are features so important that they are equal to physical size and appearance. The Border Collie has extraordinary instinct and an uncanny ability to reason. One of its greatest assets is the ability to work out of sight of its master without commands. Breeding based on this working ability has made this breed the world's premier sheep herding dog, a job the Border Collie is still used for worldwide.

GENERAL APPEARANCE
The Border Collie is a well balanced, medium-sized dog of athletic appearance, displaying gracefulness, power and agility in equal measure. It's hard, muscular body conveys the impression of effortless movement and endless endurance. The Border Collie is extremely intelligent, with its keen, alert expression being a very important characteristic of the breed. Those aspects of structure, movement or temperament that would enhance the dog's ability to function as a herding dog are virtues that should be strongly rewarded. The Border Collie is, and should remain, a natural and unspoiled true working sheep dog whose conformation is described herein. Honorable scars and broken teeth incurred in the line of duty are acceptable.

SIZE, PROPORTION, SUBSTANCE
The height at the withers varies from 19" to 22" for males, 18" to 21" for females. When viewed from the side, the body from point of shoulder to point of buttocks is slightly longer than the height at the withers. The length to height ratio is approximately 10:9. Correct bone must be moderate, strong and oval. Overall balance between height, length, weight and bone is crucial and is more important than any absolute measurement. Dogs must be presented in hard working condition. Excess body weight is not to be mistaken for muscle or substance.

HEAD
Expression is intelligent, alert, eager, and full of interest. Eyes are set well apart, of moderate size, oval in shape. Any eye color is acceptable, but blue eyes in dogs other than merle are not preferred. Eye rims should be fully pigmented. Ears are of medium size, set well apart, one or both carried erect and/or semi-erect (varying from 1⁄4 to 3⁄4 of the ear erect). When semi-erect, the tips may fall forward or outward to the side. Ears are sensitive and mobile. Skull is relatively flat and moderate in width. The skull and muzzle are approximately equal in length. In profile the top of the skull is parallel with the top of the muzzle. Stop moderate, but distinct. The muzzle is strong, tapering slightly to the nose. The sides of the head should taper smoothly into the muzzle. The underjaw is strong and well developed. Nose should be fully pigmented. Nostrils are well developed. A full complement of strong healthy teeth should meet in a scissors bite.

NECK, TOPLINE, BODY
Neck is of proportional length to the body, strong and muscular, slightly arched and blending smoothly into the shoulders. Topline: Back is level with a slight muscular rise over the loin, falling to a gently sloping croup. Body is athletic in appearance with a deep, moderately broad chest reaching no further than the point of the elbow. The rib cage is moderately long with well sprung ribs. Loin is moderately deep and short. Underline should have a slight but distinct tuck up. The tail is set on low and is moderately long with the bone reaching at least to the hock. The ideal tail carriage is low when the dog is concentrating on a given task and may have a slight upward swirl at the end like a shepherd’s crook. In excitement it may be raised, but the base of the tail should not curve forward over the back.

FOREQUARTERS
Forelegs should be parallel when viewed from front, patterns slightly sloping when viewed from side. Because sufficient length of leg is crucial for the type of work the breed is required to do, the distance from the wither to the elbow is slightly less than from the elbow to the ground. The shoulder blades are long and well laid back. Shoulder blades and upper arms are equal in length and meet in a right angle as nearly as possible. The prosternum is easily felt but not pronounced. There is sufficient width between the tops of the shoulder blades to allow for the characteristic crouch when approaching and moving stock. The elbows are neither in nor out. Feet are compact, oval in shape; pads deep and strong, toes moderately arched and close together with strong nails of moderate length. Dewclaws may be removed.

HINDQUARTERS
Broad and muscular, in profile sloping gracefully to the low set tail. The thighs
are long, broad, deep and muscular. Stifles are well turned with strong well let down hocks. Proper length of hock is approximately \( \frac{1}{3} \) to \( \frac{1}{2} \) the height of the dog. When standing with the hocks perpendicular to the ground the toes of the rear feet should be in line with the point of the buttock. Rear feet should be parallel, but may toe out slightly when free-standing. Feet are compact, oval in shape; pads deep and strong, toes moderately arched and close together with strong nails of moderate length. Dew claws should be removed.

**COAT**

Two varieties are permissible, both having close-fitting, dense, weather-resistant double coats with the top coat either straight or slightly wavy and coarser in texture than the undercoat which is soft, short and dense. The rough variety coat may vary in length without being excessive. Proper texture is more important than length. Forelegs, haunches, chest and underside are feathered and the coat on face, ears, feet, fronts of legs is short and smooth. The smooth variety is short over entire body, is usually coarser in texture than the rough variety and may have slight feathering on forelegs, haunches, chest and ruff. Neither coat type is preferred over the other. Seasonal shedding is normal and must not be penalized. Excess hair on the feet, hock and pastern areas may be neatened for the show ring. Whiskers are untrimmed. Dogs should be presented naturally, without excessive trimming or sculpting.

**COLOR**

The Border Collie appears in all colors or combination of colors and/or markings. All colors are to be judged equally with no one color or pattern preferred over another. White markings may be clear white or ticked to any degree. Random white patches on the body are permissible but should not predominate. The predominant ear color should match the primary body color. Color and markings are always secondary to physical evaluation and gait.

**GAIT**

The Border Collie is an agile dog, able to suddenly change speed and direction while maintaining balance and grace. Endurance is its trademark. The head is carried level with or slightly below the withers. When shown, Border Collies should move on a loose lead and at moderate speed, never raced around the ring with the head held high. When viewed from the side the trot covers the ground effortlessly with minimum lift of feet. The topline is firm with no roll or bounce. Front reach and drive are symmetrical, with the front foot meeting the ground directly under the nose and the rear foot pushing back without kicking up. When the rear foot is coming forward, it should reach to the spot just vacated by the front foot. Viewed from the front, action is forward and true without wasted motion. Viewed from the rear, hindquarters drive with thrust and flexibility with hocks turning neither in nor out, moving close together but never touching. The legs, both front and rear, tend to converge toward the center line as speed increases. Exaggerated movement is not efficient, and therefore is not useful to the Border Collie.

**TEMPERAMENT**

The Border Collie is energetic, intelligent, keen, alert, and responsive. An intense worker of great tractability, it is affectionate towards friends but may be sensibly reserved towards strangers. When approached, the Border Collie should stand its ground. It should be alert and interested, never showing shyness, fear, dullness or resentment.

**FAULTS**

Any deviation from the foregoing should be considered a fault, the seriousness of the fault depending upon the extent of the deviation, and the degree to which working ability would be impacted.

**CONFORMATION JUDGES**

As a result of the October 2010 Board Meeting, publication notice in the Gazette was combined into one notice, therefore the judging approval process continues to include an opportunity for the fancy to respond to each permit judge. Letters concerning judges and permit judges should be addressed to the Judging Operations Department at PO Box 900062, Raleigh, NC 27675-9062. Letters concerning Agility, Obedience, Rally, Tracking, and VST applicants should be addressed to the Companion Events Department in North Carolina. The American Kennel Club will, at the request of a judge or judge applicant, provide that individual with copies of letters received by AKC concerning their qualifications. As a result, it should be understood that any such correspondence will be made available, upon request, to the judge. It is the responsibility of all Conformation and JS judges to notify the Judging Operations Department of any changes or corrections to their address, phone, fax or emails. These changes are very important because they affect your judges’ record, the web site and the Judges Directory. Please notify Judging Operations at (919) 816-3593 or email, judgingops@akc.org.

**PERMIT JUDGES**

The following persons have been approved on a Permit basis for the designated breeds in accordance with the current judging approval process. They may now accept assignments and the fancy may still offer comments to Judging Operations.

Currently the Certificate of Merit Title requires earning 15 points.

Parent Club Performance Event - Bouvier des Flanders Eligible to Earn Schutzhund Titles

The Board VOTED that AKC will record Schutzhund titles earned by Bouvier des Flandres at DVG America events. DVG America is an all-breed schutzhund organization. The AKC will record the following titles – BN, IPO1, IPO2, IPO3, SchH1, SchH2, SchH3, SchHA, FH1, FH2. The recording of these titles is at the request of the owner, who fills out a form developed by the Performance Events Department and pays a fee. The titles must be confirmed prior to being recorded by the AKC. AKC will acknowledge titles earned back to January 1, 2000. This is effective August 1, 2013.

Retriever Hunting Tests-Two Technical Recommendations from Advisory Committee

The Board VOTED to amend Chapter 5, Section 6, of the Retriever Hunting Test Regulations and to add a new paragraph #5 to Chapter 2, Section 1 of the Retriever Hunting Test Regulations. These changes are meant to bring greater consistency to the sport.

Chapter 5, Section 6 – the wording regarding walk-ups was modified in the Senior test to state “at least one of the hunting situations shall include a walk-up”, The word “should” was changed to “shall” to eliminate inconsistency between tests caused by some judges interpreting “should” as meaning it is not required.

Section 6, Senior Hunting Test. Dogs shall be tested in a minimum of four hunting situations that shall include one land blind, one water blind (that may be run as a double blind on land and water), one double land mark, and one double water mark. There shall be at least one diversion shot and at least one of the hunting situations shall include a walk-up. In Senior tests, a double mark is defined as two marks presented before the dog is sent to retrieve. Blinds shall not be run between marks in Senior Hunting Tests.

Chapter 2, Section 1, - new paragraph 5 was inserted to require a judge to fill out the score sheet.

Paragraph 5
A judge must record on the Evaluation Form (score sheet) the score assigned for each ability being evaluated in each series. A judge may not simple note that the dog qualified or did not qualify. The form must be completed with the dog’s numeric scores prior to determining if the dog qualified. The Evaluation Form must be retained by the judge for at least 60 days following the end of the test.

These changes are effective September 1, 2013.

Revised Policy

Event catalogs will not be made available for sale until one hour prior to the first AKC event in the catalog for which the catalog is the official catalog of record.

A separate copy with all placements and absences marked must be submitted to the AKC for each AKC event in the catalog for which the catalog is the official catalog of record.

Individual Clubs

Individual clubs holding single or consecutive days of competition may use a combined catalog. The combined catalog can be designated as the official catalog of record for all or some of the AKC events contained within it. If the catalog contains AKC event and entry information for which it is not the official catalog of record, the catalog must include a disclaimer prior to each AKC event for which the catalog is not the official catalog of record. The disclaimer must designate that the information is unofficial and must identify the secretary/superintendent responsible for the content.

Multiple Clubs

Multiple clubs holding single or consecutive days of competition may use a combined catalog if the catalog is the official catalog for all AKC events within it and if a single person/entity is respon-
sible for managing the entries for all AKC events.

**Revisions to Commercial Filming at Events Policy**

The Board reviewed its Commercial Filming at Events policy. Margaret Poindexter and Michael Canalizo, AKC Staff were present for this portion of the meeting. This will be reviewed further at the September 2013 meeting.

**Standing Approval of Certain Special Attractions**

Individual clubs will no longer have to seek written AKC approval on an event-by-event basis for the following Special Attractions.

**Canine Partners in Companion Events**

Staff gave an update on Canine Partner participation in Companion Events. In 2012 96% of Agility events, 87% of Obedience events and 89% of Rally events were open to canine partners. In 2013, for events held or approved through June 14, 2103, 97% of Agility events, 95% of Obedience events and 95% of Rally events were open to canine partners.

**Border Collie Standard**

The Board reviewed proposed revisions to the Border Collie standard as submitted by the Border Collie Society of America.

Following a motion by Dr. Battaglia, seconded by Mr. Powers, the Board VOTED (unanimously) to have the proposed breed standard revision published on the Secretary’s Page for comment.

Meeting adjourned on Monday July 22, 2013 at 5:15 pm.

Meeting reconvened on Tuesday July 23, 2013 at 9:00 am.

All Directors were present, except for Mr. Kalter, who was absent due to his ongoing service as foreman of a federal grand jury, as were the Executive Secretary, the Chief Operating Officer and the Assistant Executive Secretary. The meeting was chaired by Dr. Newman.

**NEW BUSINESS**

**AKC/PAC**

Mr. Ashby reported on the fundraising efforts of the AKC/PAC.

**Online Judges Education**

There was further discussion on the subject of online education for AKC conformation and obedience judges, which could supplement or replace required seminars.

**Reinstatement of Disqualified Dogs**

Mr. Wooding reported that the Delegate Dog Show Rules Committee was looking at the reinstatement process and considering whether the reinstatement examination should be done by AKC judges when it involved a dog disqualified for attacking.

During discussion it was pointed out that the intent was to recreate the judging scenario where the decision on the disqualification occurred. The current reinstatement procedure has been in place for decades.

It was VOTED to adjourn Tuesday, July 23, 2013 at 11:15 am.
